

Local Services

Enhance today, prepare for tomorrow.

We support Plain Old Telephone Services (POTS) lines you have in place today and when you're ready, we'll move you into current technologies. Experience the ease of management as we help you select the number of lines and features that's just right for your business.

Choose from a variety of plans to fit your business needs. Plans include: unlimited local calling, a choice of long distance plans, international calling plans, as well as a host of popular calling features.

Key Benefits:

- Nationwide coverage from one provider
- Popular calling features, including: Caller ID, Call Waiting, Call Forwarding, Call Hunting, Voicemail, Speed dialing, and more
- Reliable analog line solution that can be used as back-up to other systems

Combine your local and long distance service for one monthly bill or boost your business access by selecting one of our many local service plans. These plans give you combined local and long distance service plus special area rates and calling features to suit your business needs.

Your business relies on your telephone service to stay connected to your customers. We use established networks to offer local service nationwide. With Access Point you get a reliable telephone network, cost savings, a full range of features, a single bill and our personalized customer service.

Why Choose Access Point?

✓ SAVINGS

Controlling and understanding today's telecom costs is a key concern for businesses. We understand that telecom expense management is a high priority. We believe competitive rates and a supreme billing system is vital to successfully controlling these expenses.

✓ ESTABLISHED

While other telecom companies come and go, we've been going strong since 1996. Since inception, we have positioned ourselves to be an alternative for businesses that want superior, personalized attention and responsive customer service along with competitive market pricing.

✓ US-BASED CUSTOMER SERVICE

Customer Service is what makes Access Point the best choice for your business telecommunication needs. Our customer service department is available 24/7, with responses to 98.7% of calls within 30 seconds.

From traditional voice and data services to leading edge IP-based solutions, we have what you need.

Whether supporting growth, migrating to a new technology or collaborating on unique service terms, we will partner with you to achieve your goals, even as they evolve.

It's time to consolidate your services and reduce costs with the telecom company known for strong growth and satisfied customers for almost two decades.
