

Collaboration Services

Premium cloud-based collaboration services make doing business easier.

Audio Conferencing

Enhance your remote collaboration and virtual events with crystal clear audio

Simple and easy audio conferencing, for small meetings or large events, at anytime, anywhere. On-demand, self-service audio conferencing is available 24/7 for an unlimited number of participants. With local live assistance, audio conferencing is the perfect solution for collaborating with your colleagues and business contacts around the globe.

- Travel expense savings with instant global conference access
- Crystal clear and stable audio for efficient conference calls
- Local live assistance to help you and your participants in conference
- Global access with local country numbers for international attendees
- Additional security with optional single-use PIN codes

Video Conferencing

Add facial expressions and emotions to really get your message across

Video conferencing is a new generation of conferencing, accessible online on a secure private cloud. With High Definition image quality, this service offers truly life-like, face-to-face virtual collaboration that is instantly available without reservation. Utilize natural face-to-face virtual communication and collaboration to boost your business efficiency.

- Increase the impact of your communication with virtual face-to-face meetings
- Improve the productivity and mobility of your entire workforce
- Facilitate end-user adoption with a web-based intuitive interface
- Reduce your operational costs with low infrastructure investment
- Secure your communications

Web Conferencing

Improve collaboration by sharing documents live via the web

Easily share your computer screen, documents and applications online in real-time so you can start working with remote colleagues and partners in seconds, wherever they are. Meet 'face-to-face' with fully integrated video conferencing so you can see who you're speaking to and how they respond.

Audio conferencing can become a challenge when discussing a document or attending a presentation without visual support. With our web conferencing services, you can share documents, applications or your computer screen and even allow other participants to control your computer from a remote location.

- Instant access over the Internet without software installation
- Quick adoption thanks to a user-friendly interface
- Improved communication efficiency with superior audio quality
- Visual sharing on the move from any mobile device
- 24x7 live assistance
- Cost effective web solution with inclusive video conferencing
