

Shared Call Appearance

Shared Call Appearance allows users to have additional devices or line appearances on their phones. These devices or lines also ring just like your primary phone

This Shared Call Appearance service allows a user to have several phones for the same number and services shared on several phones and endpoints. For instance, have a phone at your office, one at your home and a softphone on your laptop to simply connect while you are traveling. (Simple SCA).

Specific Set Up Options:

- SCA to appear on a particular user or all in the same Group
- Different Ring Tone for each SCA
- SCA's of lines at different locations
- Users can have more than one device
